Personal Data

Detail-oriented Software Quality Assurance (SQA) Engineer with a strong foundation in full-stack web development. Highly experienced in executing comprehensive Black-Box and Regression testing methodologies to ensure the functional integrity of enterprise, government, and cultural institution systems. Proficient in Defect Tracking and Bug Life Cycle management, achieving an 84% resolution rate across 102 identified system bugs in a recent enterprise project. Adept at API integration testing, security vulnerability assessments (utilizing tools like OWASP ZAP), and collaborating seamlessly with development teams to deliver stable, secure, and user-friendly software applications.

Work Experience

PT Primalogic Global Teknologi (Jakarta, Indonesia)

Fullstack Developer (March 2026 – June 2026)

- Executed Vendor Integration Testing (VIT) and rigorous black-box testing methodologies for the enterprise-scale DP PKT (Pension Fund) system, ensuring seamless data flow and functional integrity across Administrator, Accounting, and Membership modules.
- Implemented a structured Defect Tracking and Bug Life Cycle Management process using comprehensive Issue Logs to identify, document, and classify software anomalies based on Priority and Severity metrics.
- Collaborated seamlessly with the backend development team to communicate technical defects, executing precise retesting protocols to validate bug fixes prior to production deployment.
- Successfully identified, tracked, and managed 102 system bugs, achieving an 84% resolution and closure rate, which significantly minimized critical errors and improved overall system stability for client handover.
- Independently developed a full-featured Project Tracker web application using .NET and SQL Server, complete with SSRS-based interactive reports to visualize project status, task completion rates, and team performance for management review.

Museum of Geology (Bandung, Indonesia)

Fullstack Developer (June 2024 – December 2024)

- Engineered a web-based museum collection management system utilizing Laravel, React.js, and Tailwind, alongside an optimized database architecture, to transition the museum from fragmented manual tracking to a centralized, efficient, and responsive platform.

- Streamlined workflows by integrating Ministry (ESDM) REST APIs, implementing CAS-based Single Sign-On (SSO) for secure authentication, SIPEG for automated employee data synchronization, and standardized regional data services.
- Fortified application security by developing robust authentication and authorization workflows, and improved overall system stability and response consistency through comprehensive backend debugging and performance optimization.
- Successfully configured and deployed the full-stack application to a production hosting environment, ensuring stable operational availability and seamless live access for internal staff.

Center for Marine Geological Survey and Mapping (Bandung, Indonesia)

Web Developer (June 2022 – September 2022)

- Developed two operational, responsive web applications utilizing Laravel and Bootstrap to streamline meeting management and improve research map accessibility for internal users.
- Designed and implemented structured MySQL databases to ensure organized data storage, reliable querying, and seamless overall system functionality.
- Managed stable server-side operations by maintaining backend reliability and enforcing security measures for safe and efficient data handling.
- Facilitated organizational digitization efforts by assisting in network setups and document conversion workflows to optimize research material management.

Skills & Competencies

- | | |
|----------------|--------------|
| ▪ Tailwind CSS | ▪ Laravel |
| ▪ Bootstrap | ▪ MySQL |
| ▪ React JS | ▪ PostgreSQL |
| ▪ .NET | ▪ SQL Server |
| ▪ C# | |

Education

International University of Logistics and Business (2023 - 2026)

High School Diploma in Informatics Engineering

Organizational & Leadership Experience

- Guest Speaker for MORRIS IF'24 | Universitas Logistik & Bisnis Internasional Delivered a comprehensive session on "Basic Programming Concepts" to newly enrolled Informatics Engineering students, establishing a strong foundational understanding of software development and motivating their academic journey.
- Participated in a Community Service Program (PKM) at SMK Negeri 2 Cimahi focused on improving web programming skills through a Laravel bootcamp. Acted as a facilitator

by delivering basic materials and assisting Software Engineering students in building a simple Todo List web application using Laravel.

- AI Technology Trainer for Community Service (PKM) | SMKN 3 Bandung Facilitated a technical training session for educators on "The Utilization and Ethics of AI for School Administration," aiming to enhance administrative workflow efficiency and promote responsible digital literacy

Certifications

University of Logistics and International Business (PKM) Sep 2025

Resource Person for Laravel Bootcamp Workshop – Web Programming Training for SMKN 2 Cimahi

University of Logistics and International Business Dec 2024

Internship Matching Fun Bandung Geological Museum

University of Logistics and International Business May 2024

Bootcamp Speaker

SAP University Partnership Program Jan 2024

Certificate Of Accomplishment – Has Completed the SAP Course
